Re: Information on current area covered by detection with smoke detectors and cameras in SmokeD system on the territory of RDSF in Szczecinek

In response to your request for the current area where smoke detectors and cameras of the SmokeD system are used for early detection of forest fires, according to data as of 31 December 2024, the following are used: 45 fixed SmokeD detectors deployed in 9 locations and cameras located in 43 sites.

The area covered by the early smoke detection system using cameras and fixed detectors is about 554,855.34 hectares out of a total area of 631,165.24 hectares, which constitutes ca. 88% of the area of the RDSF in Szczecinek.

Yours sincerely,  
Stawomir Cichoń  
Deputy Director for Forest Management
