Re: Smoke D Systems

The City of Hidden Hills, after suffering through the Woolsey Fire of late 2018, purchased 2 Smoke D Systems cameras and installed them on the highest hill in our city where our radio repeater site is located. We had them pointed west and north toward the open space, a California State park, which typically has high dry grass in the summer and fall. With few problems that were encountered with our wi-fi signal, the cameras themselves have worked amazingly. We have been alerted early to several nearby brushfires and even a house fire in a neighboring community. Luckily none of these incidents have been destructive to our community.

The Smoke D Systems cameras have been a comfort to our staff and our City.

Thank you, IT for Nature.

Larry G. Weber

Mayor

City of Hidden Hills, California
